

**1. DO Number and Title: Flight Crew Operations Web / Computer-Based Training Development**

**2. Contacts, Program, and WBS**

**DO Contact Information:**

**DO Manager:** Scott Reagan

**Phone:** 713-303-3546

**DO Mgr. Alternate:** Bob Hines

**Phone:** 850-240-5780

**Program:** ☐ ISS ☐ MPCV ☐ Commercial ☐ AES ☐ OCT ☒ Other

**Task Classification (reference NPD 8730.5):** ☐ Critical ☐ Complex

**Task involves:**

☐ Flight Hardware ☐ Flight Software ☐ Ground Support Equipment

☐ Quality Assurance Oversight ☒ On-site Development

**Capability Maturity Model Integration (CMMI) Required:** ☐ Yes, Choose level ☐ No

-----  
**WBS:** ☐ 2.0 EVA ☐ 3.0 FCE ☐ 4.0 Robotics ☐ 5.0 ECLSS ☐ 6.0 ATCS

☐ 7.0 CheCS ☐ 8.0 Avionics ☐ 9.0 GFE (General) ☐ 10.0 Payloads

*WBS reporting shall be done in accordance with applicable WBS reporting categories, as shown above and in the contract within Section C, Table 1.*

**3. Technical**

**3.1 Background/Problem Description**

Flight Crew Operations Division (FCOD) currently provides instructor-led Instrument Refresher Courses (IRC) on a regular basis. Each course requires pilot instructor availability and resource commitments affecting task implementation and completion. Changing commitments in other areas have significantly reduced the availability of pilot instructors available to teach these repetitive but required courses. In order to decrease pilot instructor commitment, these courses will be transferred to Computer/Web Based Trainers (C/WBT) to allow flexibility and availability of course content for trainee completion.

### **3.2 Objectives**

Development and delivery of six C/WBT courses. These courses will be developed from existing, instructor led, Flight Crew Operations Training Courses.

### **3.3 Prior Work**

Instructor led courses have been developed to different degrees in each of the six areas. The first course (IRC) was developed in-house and is conducted on a regular basis. The five additional courses (Aircraft Systems Courses) were developed mostly in-house and vary in degree of completeness. Current courses exist primarily in the format of Microsoft PowerPoint slideshows.

### **3.4 Requirements (Statement of Work)**

Base Delivery Order Effort:

1. Perform a training analysis to include interviews with course developers, subject matter experts and instructors to understand training requirements, collect training references and manuals, review video recordings of instructor-led courses, select a training delivery tool and collect other information about ultimate training goals as necessary.
2. Develop audio scripting for the existing course slides and for slides developed as part of this effort based on the results of needs analysis.
3. Develop new slides in conjunction with FCOD instructors to improve training points as necessary.
4. Utilize or integrate with NASA-approved software to build the training package into a coherent C/WBT. In addition to having an overall professional theme and operation, this should include integration with existing record-keeping software used by FCOD.
5. Set periodic reviews to allow for FCOD evaluation, modification, and comments for incorporation into the end-product.
6. Deliver C/WBT to FCOD ready to execute on NASA servers.

Options:

For the following options, the contractor shall perform the following for the system specified under the specific option:

- Perform training needs analysis including interviews with Project Pilots, other instructors, and subject matter experts to understand training requirements, collect training references/manuals, review video recordings of instructor-led courses, select a delivery training tool (if different than base effort – supply justification), and collect other information as necessary to achieve end goals for this training.
- Develop audio scripting for the courseware and slides developed as part of this effort based on results of needs analysis.

- Develop new/updated courses in conjunction with appropriate FCOD instructors as necessary to meet training objectives.
- Utilize or integrate with NASA-approved software to build the training package into a coherent C/WBT. In addition to an overall professional theme and operation, this should include integration with existing record-keeping software used by FCOD.
- Set periodic reviews to allow for FCOD evaluation, modification, and comments for incorporation.
- Deliver C/WBT to Flight Crew Operations Directorate ready to execute on NASA servers.

These options can be exercised up to the last day of the period of performance.

Option 1: Instrument Refresher

- Period of performance: 12 weeks post award

Option 2: Gulfstream III (G-3)

- Period of performance: 8 weeks post award

Option 3: WB-57

- Period of performance: 16 weeks post award

Option 4: Super Guppy

- Period of performance: 16 weeks post award

Option 5: C-9

- Period of performance: 16 weeks post award

### **3.5 Government Furnished Property**

The items listed below as “Government Furnished Property” are current training materials primarily in the form of a series of Microsoft PowerPoint presentations. These materials will be provided in the most up-to-date version available. Additional information may be provided by Subject Matter Experts (SME) within FCOD.

Item	Basic/Option	Quantity	Delivery Date
------	--------------	----------	---------------

			(weeks post award)
T-38 Systems Slides	Basic	1	8
Instrument Refresher Course Slides	Option 1	1	Exercise date
Gulfstream III (G-3) Systems Slides	Option 2	1	Exercise date
WB-57 Systems Slides	Option 3	1	Exercise date
Super Guppy Systems Slides	Option 4	1	Exercise date
C-9 Systems Slides	Option 5	1	Exercise date

### 3.6 Deliverables/Products

The table below identifies the deliverables/products and the associated description, quantity (qty), due date, and the respective Flight Class (I, II, III, IV).

Product	Description	Qty	Due Date (Option: <i>post-award</i> )	Option
<b>Software</b>				
Training Unit	T-38 Aircraft Systems Refresher Course C/WBT	1	7/1/2013	Basic
Training Unit	Instrument Refresher Course C/WBT.	1	12 weeks	Opt 1
Training Unit	G-3 Aircraft Systems Refresher Course C/WBT	1	8 weeks	Opt 2
Training Unit	WB-57 Aircraft Systems Refresher Course C/WBT	1	16 weeks	Opt 3
Training Unit	Super Guppy Aircraft Systems Refresher Course C/WBT	1	16 weeks	Opt 4
Training Unit	C-9 Aircraft Systems Refresher Course C/WBT	1	16 weeks	Opt 5
Other	Click here to enter text.	Click here to enter text.	Click here to enter a date.	
<b>Other Products</b>				

Product	Description	Qty	Due Date (Option: <i>post-award</i> )	Option
Preliminary Design Review (PDR)	Review initial design (30% complete) with Subject Matter Experts and/or Project Pilots	1 ea (for basic and options)	N/A	All
Critical Design Review (CDR)	Review near-complete (60%) design with Subject Matter Experts, Project Pilots and/or management.	1 ea (for basic and options)	N/A	All

### 3.7 Data Requirements Description (DRD)

The table below summarizes the reporting requirements (via DRD) for this DO. The Non-Technical (NT) DRDs such as Status reports, Wage/Salary Data, 533 submittals, IT plans and reports, export control, and patent rights DRDs have been excluded from this template since they are at the contract level.

For contract details refer to <http://procurement.jsc.nasa.gov/crave2/default.asp>

Note the following:

1. Grey scaled rows need no additional/required fill-ins.
2. On all other rows, if necessary, check the box if required by double clicking box and selecting "Checked".
3. Fill in additional requirements/deliverables in the last column.
4. Data Types: WA=Written Approval; MS=Mandatory Submittal; UR=Submitted Upon Request
